

Statement of Support from the Danish Trade Union for IT Professionals to the Striking Workers at Evolution Georgia

Dear Colleagues at Evolution Georgia

On behalf of PROSA – the Danish Trade Union for IT Professionals – we extend our full solidarity and support to you in your ongoing strike. Your courage in standing up for fair working conditions, respect for labour rights, and a safe workplace resonates deeply with us.

The IT sector, more than ever, operates within a globalized value chain where tasks are decentralized and distributed across borders. Despite your contribution towards billions in profits for Evolution Games you are subjected to inadequate pay, managerial harassment as well as unsafe and even unsanitary conditions. This situation is in no way acceptable.

As a large tech company with its international headquarters based in Sweden, Evolution should certainly live up to basic standards regarding decent wages and dialogue with employees. In PROSA we recognise the company as a leading provider of online gaming and casino services, but certainly not as a leading example regarding labour conditions.

We recognise the immense pressure you are under during the present conflict, and we commend your resolve to fight for what is just. Your actions are a powerful reminder that workers, united, have the strength to demand change and to hold companies accountable for their treatment of employees.

In order to support your fight – which is our fight too – we are donating DKK 5000 (EUR 670). Your bravery inspires us all, and we believe that through solidarity and collective action, we will achieve the fair and just working conditions that all workers deserve.

In solidarity,

Mirza Cirkinagic

Union Secretary
